BIG BYTE IT SOLUTION PVT. LTD.

A COMPUTER EDUCATION DIVISION

ABOUT BIG BYTE IT SOLUTION PVT. LTD.

The rapid expansion of computer technology and the increasing complexity of information systems generate a need for more sophisticated and effective methods of structuring information for purposes of storage, analysis and retrieval..

It requires information system professionals who are aware of the opportunities and challenges resulting from the application of computer technology. They should also be capable of understanding both the information needs of managers, administrators, other end users and the information needs of designing the appropriate computer base systems.

Students are trained to design and implement information systems. that enhance organizational function, add value to existing products or customers, provide new products, enhance or add to distribution channels or enhance decision making and become successful and dynamic IT professionals of tomorrow. Big Byte IT Solution Pvt Ltd. is well-known for providing quality education in the field of Hardware/Networking, Mobile Repairing & Specialization courses in software. One feature of our company is close working relationships between faculty and students, both inside and outside the classroom. Teaching is not just delivering content to our students, but a continuous intellectual exchange between the two parties. It is this bidirectional flow of ideas that provides an ideal environment for learning. It is through this process that faculty members learn how to teach and students learn how to learn. Quality teaching cannot be confined to the study of well-established theories. It needs to touch the frontiers of different branches of IT industry in order to provide our students with a clear vision for the future. It is for this purpose we have established Big Byte IT Solution Pvt. Ltd. In this company, faculty and students will work together thereby, deepening their understanding of their academic disciplines. It is the collaborative nature of the training that provides mutual benefits to our faculty and students. In the coming years, information technology will continue to transform the way we think, work, communicate, and learn. The tremendous success of information systems technologies coupled with advances both in hardware and systems engineering will invigorate the existing proliferation of applications, services and products that will recede increasingly into the background of our lives. To help students cope up with new emerging market technologies I promise them the best of our service and good luck.

MISSION

Provide every student with a platform to refine his/ her skills and make a mark in the computer literate world. To sharpen ones skill and master new technologies and establish itself with a mission of “Bringing People and Computers Together Successfully”.

To Excel in the emerging areas of Computer Science and Engineering by imparting knowledge, relevant practices and inculcating human values to transform the students as potential resources to contribute innovatively through advanced computing in real time situations. Mission To provide strong fundamentals and technical skills for Computer Science.
